Applicant: Ryoichi Saitoh et al. Attorney's Docket No.: 14875-0133US1/C1-A0206P-US

Serial No.: 10/509,343 Filed: June 21, 2005 Page: 2 of 10

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

- (Currently amended) A method for preparing a budding virus expressing a mammalian transporter having transporter activity, the method comprising
- (a) culturing a host cell that (i) is infected with a budding virus that comprises a gene encoding the transporter and (ii) is recombinantly expressing the transporter;
- (b) expressing the transporter on the envelope of a budding virus released from the host cell; and
- (c) harvesting the released virus, wherein the transporter on the envelope of the released virus has transporter activity.
 - 2. (Original) The method of claim 1, wherein the virus is a baculovirus.
 - 3. (Cancelled) The method of claim 1, wherein the transporter is of non-viral origin.
- (Previously presented) The method of claim 1, wherein the transporter is a peptide transporter or an organic anion transporter.
- (Previously presented) The method of claim 1, wherein the transporter is H+/ditripeptide transporter 1 (PepT1), H+/di-tripeptide transporter 2 (PepT2), or organic anion-transporting polypeptide-C (OATP-C).
- (Previously presented) A purified baculovirus, the envelope of which comprises a mammalian transporter having transporter activity.

Applicant: Ryoichi Saitoh et al. Attorney's Docket No.: 14875-0133US1 / C1-A0206P-US

Serial No.: 10/509,343 Filed: June 21, 2005 Page: 3 of 10

7-9. (Cancelled)

10. (Previously presented) The baculovirus of claim 6, wherein the transporter is a peptide transporter or an organic anion transporter.

- (Previously presented) The baculovirus of claim 10, wherein the transporter is PepT1, PepT2, or OATP-C.
- 12. (Withdrawn-Currently amended) A method for measuring the activity of a <u>mammalian</u> transporter, wherein the method comprises expressing the transporter on a viral envelope the method comprising
- (a) providing a budding baculovirus the envelope of which comprises a mammalian transporter having transporter activity; and
 - (b) measuring the activity of the mammalian transporter.
 - 13. (Cancelled) The method of claim 12, wherein the virus is a budding baculovirus.
- 14. (Withdrawn) The method of claim 12, wherein the transporter is a peptide transporter or an organic anion transporter.
- (Withdrawn) The method of claim 14, wherein the transporter is PepT1, PepT2, or OATP-C.
- 16. (Withdrawn-currently amended) A method of screening for a substance that inhibits or promotes transport activity of a <u>mammalian</u> transporter, wherein-the method comprises the following steps:comprising
- (a) expressing the transporter on a viral envelope, providing a budding baculovirus the envelope of which comprises a mammalian transporter having transporter activity;
 - (b) contacting the transporter with a test substance, and
 - (c) selecting a substance that inhibits or promotes the transport activity.

Applicant: Ryoichi Saitoh et al. Attorney's Docket No.: 14875-0133US1/C1-A0206P-US

Serial No.: 10/509,343 Filed: June 21, 2005 Page: 4 of 10

17. (Cancelled) The method of claim 16 wherein the virus is a baculovirus.

18. (Cancelled) The method of claim 16 wherein the virus is a budding virus.

19. (Cancelled) The method of claim16, wherein the transporter is of a non-viral origin.

20. (Withdrawn) The method of claim 16, wherein the transporter is a peptide transporter or an organic anion transporter.

 (Withdrawn) The method of claim 20, wherein the transporter is PepT1, PepT2, or OATP-C.

 (Withdrawn) The method of claim 16, which comprises immobilizing the virus on a support.

23. (Withdrawn) The method of claim 22, wherein the virus is immobilized on the support through an antibody against an envelope protein expressed on the viral envelope.

- 24. (Withdrawn) The method of claim 22, wherein the virus is immobilized on the support through a biotin-streptavidin reaction by biotinylating a protein expressed on the viral envelope.
 - 25. (Previously presented) The method of claim 1, wherein the host cell is an insect cell.
- $26. \ \mbox{(Previously presented)}$ The method of claim 25, wherein the insect cell is an Sf9 cell.
- 27. (Previously presented) The method of claim 1, further comprising assaying the harvested virus for activity of the transporter.

Applicant: Ryoichi Saitoh et al. Attorney's Docket No.: 14875-0133US1/C1-A0206P-US

Serial No.: 10/509,343 Filed: June 21, 2005 Page: 5 of 10

28. (Previously presented) The method of claim 1, further comprising confirming that the transporter on the envelope of the harvested virus possesses transport activity.

- 29. (Withdrawn) The method of claim 1, further comprising using the harvested virus in an assay for detecting whether a test compound is transported by the transporter.
- 30. (Cancelled) The method of claim 1, further comprising using the harvested virus in an assay for detecting whether a test compound inhibits the activity of the transporter.
- 31. (Previously presented) The method of claim 1, wherein the budding virus of (a) is a recombinant budding virus comprising a gene encoding the transporter.
